

QbitCoin â€” Investor Dossier (EN)

****Project:**** QbitCoin â€” The Quantum Cube Blockchain

****Founder:**** Francisco RaÃºl Rueda AdÃ¡n

****Date:**** 09 November 2025, 05:58 CET

Executive Pitch

- Problem: Quantum computing threatens traditional cryptography and many blockchains.
- Solution: QbitCoin â€” RubikPoW + PQC + hybrid consensus -> quantum-resilient infrastructure.

Market Opportunity

- Demand for quantum-safe ledgers in finance, identity, supply chain and infrastructure.

Product

- Layer-1 blockchain with parametrizable security layers (3x3 -> 4x4 -> multi-cube).
- QBC token for fees, staking, governance.

Tokenomics (summary)

- Suggested cap: 21,000,000 QBC (configurable)
- Block reward example: 6.25 QBC initial
- Reward split: 60% miners, 30% validators, 10% treasury

Roadmap (high level)

- 2026 Q1: Research & Simulator
- 2026 Q2: Prototype & Testnet Alpha
- 2026 Q4: Audits & Beta
- 2027: Mainnet & Institutional pilots

Team / Ask

- Core devs, cryptography researchers, business development.
- Funding ask: see detailed budget in Whitepaper Appendix.
